When I got this game I expected something like Dance Dance Revolution or Deemo..... My mistake... This game's story makes no sense at all and it's really REALLY corny. The controls are awkward and personally I don't like how the whole thing works.... In other words, don't get this game full price, if anything get it while it's on sale.

On the bright side I only spent 99 cents!. Its a fun game to screw around with and to have just for laughs. Not recommended if its not on sale.... A very nice and fairly difficult platformer. I love platformers with grappling line\swinging gimmicks and that is basically what this is all about. The jumping is a little bit floaty but you will be thankful for that because it will give you time to aim your landing better. You have to be incredibly precise with both your jumping and swinging to succeed.

The game is score-attack based. It is totally possible to clear stages but take so many times and miss so many point icons that you are left with an absolutely embarrassing mediocre score. That's prettymuch where I am with it right now. If you are the type of player that enjoys games like Dustforce or Super Meat Boy where you practice and get better and better until you can clear levels in one fluid motion I would recommend it. It is a game for perfectionists and I'm not sure I will have the patience to clear all of it.

What I have played is fun.. Though the trailer is very well done and convinced me to get this game, it just doesn't hold interest for very long, especially with the only really 'fun' I could have existing in the multiplayer function.

The multiplayer is difficult to access, though; it's difficult to find anyone playing the game without waiting a very long time, especially for matches with more than 2 persons.

There are specific ways to hit the ball as well, which are never explained in game and are only referenced in the achievements, for example, I found out what a "Home Run" was by guessing, did a "Jam" by pure accident, and still have no idea what a "Slam Dunk" is or how to perform one.

I'm sure it appeals to some group that isn't me, though, so if you're into VIDEOBALL™ or VIDEOBALL™-related activities, go for it.. wierd game

ok, but wierd. This is a great HTC Vive experience. The game is complete with regular updates. The developers are very active, responding to the discussion board when people have problems. It's a great game to play, and a go-to when showing off the Vive as it's easy to pick up and doesn't scare people (you don't have to worry about people slamming the ceiling with your controller). It also doesn't take a lot of space for room scale, so if you're like me and have a small play area, this game is perfect. I feel it's well worth the \$20 asking price, especially when comparing to other VR games right now asking more for less.. This app has a long ways to go, but it's a good start. I was surprised by how slow and laggy it was to draw fog of war on. Even worse, there is no option to cover your whole map in fog of war. You have to do it manually, which is very slow and tedious.

Also, there is no option to draw the fog of war in a square shape, only a circle. Why would you want to draw with a circle tool when the map is on a square grid?

The user interface looks like a file browser, it makes the experience feel cheap.

Overall, this thing is real clunky, but it can work in a pinch.. Good game to get you introduced to AGEOD's game mechanics.

Can't play online with friends. Horrible.. The real puzzle is why i spent money on this. Puzzle bots is a short little puzzle game that will take you between and a half and hours to finish, depending on your puzzle solving skills.

It's a light bite, that you can finish in an afternoon, but it's quite quite and funny.

I personally got it in an indie bundle, and didn't get around to playing it until just now, and I'm glad I did, though €4.49 seems a bit much in my opinion, you might want to pick it up in a sale, as it's a perfect intro into the puzzle genre.

. Nothing spectacular. Fun casual game, and worth the money.. Great Game but....

Cons:

Zero optimization for PC or Controllers.

Cant get Steam Controller to work.

No Grafik option

Fullscreen only works on Steam Big Picture Mode

Pros:

The Game itself seems to run fluid but cant tell how far cause i had other problems to play it.

Additional Info:

I made it work on my noname psx Controller somehow. 2 other Controllers didnt worked.

When i try to configure Controller ingame, the game crash.

No matter which Controller template i try in big picture mode i cant get steam controller to work besides directional buttons.

After one of 3 Controller worked it still was very bad input and controller often did things on his own in this game. Not rly playable like this atm.

I gladly like to upvote the game asoon the controller is configurable and working without any input problems.

Making the game working in fullscreen without the workaround shouldnt be too hard ether.

Any kind of grafical options like smooth grafic would be nice too.
